

SCHOOL MEALS AND SNACKS

The Madison County School Board recognizes that students need adequate, nourishing food in order to learn, grow, and maintain good health.

Generally

To reinforce the division's nutrition education program, foods sold to students during regular school hours on school premises will be

- carefully selected so as to contribute to students' nutritional well-being and the prevention of disease;
- prepared in ways that will appeal to students, retain nutritive quality, and foster lifelong healthful eating habits; and
- served in age-appropriate quantities and at reasonable prices.

The Madison County School Board promotes high-quality school meals and snacks by

- involving students in the selection, tasting, and marketing of healthy foods and beverages that appeal to students;
- providing a variety of food options, such as fruits, vegetables, whole grains, and dairy foods, which are low in fat and added sugars;
- offering a variety of healthy choices that appeal to students, including cultural and ethnic favorites;

The Madison County School Board strives to provide an environment conducive to good health by

- allowing an adequate amount of time and space for students to eat school meals;
- scheduling lunch periods at reasonable hours around midday;
- ensuring that drinking fountains are operable, clean, and convenient for use throughout the school day;
- offering extracurricular physical activity programs, such as physical activity clubs, intramural programs, or interscholastic athletics;
- discouraging the promotion and advertising of unhealthy foods;
- using non-food items rather than food items such as candy, cakes, soda, and foods high in fat, as incentives and rewards for good behavior or academic performance; and
- encouraging parents to support the division's nutrition education efforts by considering nutritional quality when selecting any snacks which they may donate for occasional class parties.

The Madison County School Board supports nutrition education and physical education by

- ensuring that qualified nutrition education and physical education specialists focus on knowledge and skill development so students are able to learn and adopt healthy eating and physical activity behaviors;
- offering nutrition education in the school dining area(s) and in the classroom, with coordination between food service staff and teachers; and
- eliminating any stigma attached to, and preventing public identification of, students who are eligible for free and reduced-price meals.

Nutritional Guidelines

Meals and snacks offered as part of the National School Lunch Program or the School Breakfast Program meet, at a minimum, the requirements established by state and federal law and regulation.

Schools make potable water available and accessible without restriction to children at no charge in the place(s) where lunches are served during the meal service.
